

## **Wind Info Enters into Strategic Partnership with Intex**

-- Intex's Market-Leading Cashflow Models for Chinese Structured Financial Securities to be Integrated inside Wind Info's Financial Terminal

Shanghai, March 14, 2017 -- Wind Info, the leading financial data, information and software services provider in mainland China, and Intex Solutions, the world's leading provider of structured fixed-income cashflow models and related analytical software, have entered into a strategic partnership to integrate Intex's cashflow models for Chinese RMBS, ABS, CLO, and CMBS securitizations into Wind Info's Financial Terminal. Wind Info and Intex anticipate the integration to be completed and available to users of the Financial Terminal by Q3 2017.

"We are excited to partner with Intex and work to expand what our Financial Terminal has to offer," said Jiang WenYan, Head of Fixed Income Solutions at Wind Info. "Intex is the leader for cashflows in the structured credit markets, and the completion of this integration will allow Wind customers to monitor and stress-test RMBS, ABS, CLO, and CMBS securities using the most accurate and timely cashflow models available within our Financial Terminal," said Jia Liu, ABS Product Manager at Wind Info.

Within Wind Info's Portfolio Page, users will be able to quickly review the current status of their portfolio of Chinese structured credit securities and generate industry-standard valuation analytics such as Price, Yield, Weight Average Life, and Total Cashflow leveraging the Intex cashflow engine and Intex's deal models. Additionally, a new Intex Page on Wind Info's Financial Terminal will allow users to perform additional sensitivity analysis on individual Chinese

structured credit securities by adjusting interest rate, prepayment, default, and loss forecasts across multiple scenarios.

"Intex is known for its global coverage of RMBS, ABS, CMBS, CLO, and CDO securitization cashflow models, while Wind is known for its broad real-time financial data and information solutions," stated Yunwen Zeng, Head of Intex's Shanghai office. "This best-of-breed collaboration will allow Wind and Intex to quickly provide market-leading transparency and valuation tools for Chinese structured securities to Wind's extensive and sophisticated user base. We look forward to jointly announcing the completion of the integration this summer!"

Wind Info and Intex each plan to support the integration out of their respective Shanghai offices.

### **About Wind Info**

Wind Information Co, Ltd. is a leading financial data, information and software services provider in mainland China, headquartered in Shanghai Lujiazui financial center. Wind Info has built up a substantial, highly-accurate, first-class financial database, which includes stocks, funds, bonds, FX, insurance, futures, derivatives, commodities, and macroeconomic and financial news.
